

EXPORT ULTRASONIC SPRAYER

method of use

STEP 0 – Hair Diagnose

- Suitable for very damaged hair: burnt, “chewing gum” texture, bleached, etc.
- Amazing result: **impeccable, radiant, healthy and extra shiny hair**
- Allows 2 different services:
 - **Nanokeratinization:** recommended for **definitive reconstruction of damaged hair and restore its natural health**
 - **Hyaluroplasty:** recommended to **hydrate, soften and give shine to the hair instantly**

STEP 1 – Deep Cleansing Shampoo

- Wash hair with the shampoo and leave on for **5 minutes** (exactly)
- Rinse with plenty of water
- Repeat this process 2 or 3 times minimum
- Until the hair is very clean and has an almost rough touch
- Remove dampness with a towel (**Do not use a hairdryer**)
- Tips for a perfect wash:
 - Do not rub hair roots too much
 - Massage the entire length of hair
 - Pay special attention to the back of the neck

Step 2–Nanokeratinization Service (Ampoules K & H)

- Apply mask and massage the entire length of hair
- Leave on for **5 minutes**, then rinse hair only with water, removing all the product
- Remove dampness with a towel (**Do not use a hairdryer**)
- Turn on the **Ultrasonic Sprayer** and fit the brush
- Add **5ml of the ampoule K of keratin** to the sprayer

- Make partitions on damp hair
- Brush hair by locks for 15 minutes (3 times by lock)
- **Do not rinse and make a perfect brushing**, starting on the back of the neck and pulling the hair locks
- Continue brushing until hair is fully dried and well-aligned
- Add **5ml of the ampoule H of hyaluronic acid** to the sprayer
- Brush hair by locks for 15 minutes (3 times by lock)
- Prepare the straightener between 180-200° according to hair's resistance
- Start on the back of the neck and run **3 times** each lock according to the type of hair
- In very damaged ends, run less times
- Finish with **Export Hair Oil** in the ends
- The treatment can also be performed partially adding only Ampule H, always after brushing and before straightening.
- **Results can be noticed after the 1st session**, but up to 4 sessions are needed to rebuild hair completely
- It is recommended to wait minimum 15 days between sessions

Step 2–Hyaluroplasty Service (Ampoule H)

- Apply mask and massage the entire length of hair
- Leave on for **5 minutes**
- Rinse hair only with water, removing all the product
- Remove dampness with a towel (**Do not use a hairdryer**)
- Turn on the **Ultrasonic Sprayer** and fit the brush
- **Make a perfect brushing**, starting on the back of the neck and pulling the hair locks
- Continue brushing until hair is fully dried and well-aligned
- Add **5ml of the ampoule H of hyaluronic acid** to the sprayer

method of use

- Brush hair by locks for 15 minutes (3 times by lock)
- Prepare the straightener between 180-200° according to hair's resistance
- Start on the back of the neck and run **3 times** each lock according to the type of hair
- In very damaged ends, run less times
- Finish with **Export Hair Oil** in the ends
- **Results can be noticed after the 1st session**, but up to 4 sessions are needed to rebuild hair completely
- It is recommended to wait minimum 15 days between sessions

STEP 3 –How to clean the Sprayer and accessories

- The Sprayer transforms liquid assets into gas nano molecules
- Due to its small size and lack of cleaning, molecules can accumulate and up breaking the plastic accessories.
- For a good maintenance it is essential and mandatory cleaning all accessories after each use
- Tips for a good cleaning of the sprayer:
 - After each session disassemble all the accessories
 - Put the accessories in the tap (plastic container, gray lid, black tube, brush, etc.)
 - Wash everything with the Deep Cleansing Shampoo and plenty of water
 - Dry with a towel
- The deterioration of the sprayer and accessories due to lack of cleaning is the responsibility of the professional

TIPS – Last Recommendations

- It is possible to wash the same day with a shampoo without salt (Sodium Chloride)
- For longer lasting results, use the **Export Home Care** line
